

IO Board

for MTX-4G-JAVA-IoT AUS Intelligent Modem

Simple IO board for MTX-4G-JAVA-IoT AUS modems, available in two versions:

MTH000000008

- Provides terminal blocks for
 - 2 x digital inputs
 - 2 x Analogue inputs

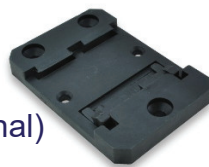

MTH000000009

- Provides terminal blocks for
 - 2 x digital inputs
 - 2 x Analogue inputs
 - 2 x Relay outputs
 plus additional terminals for power and modbus connections

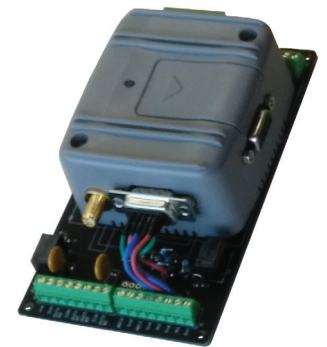

Applications include:

- » Connecting digital/pulse inputs such as alarm signals, rain gauges or water meters
- » Connecting analogue inputs such as pressure, level or temperature sensors
- » Connecting devices to be turned ON/OFF such as pumps, fans, lights or valves

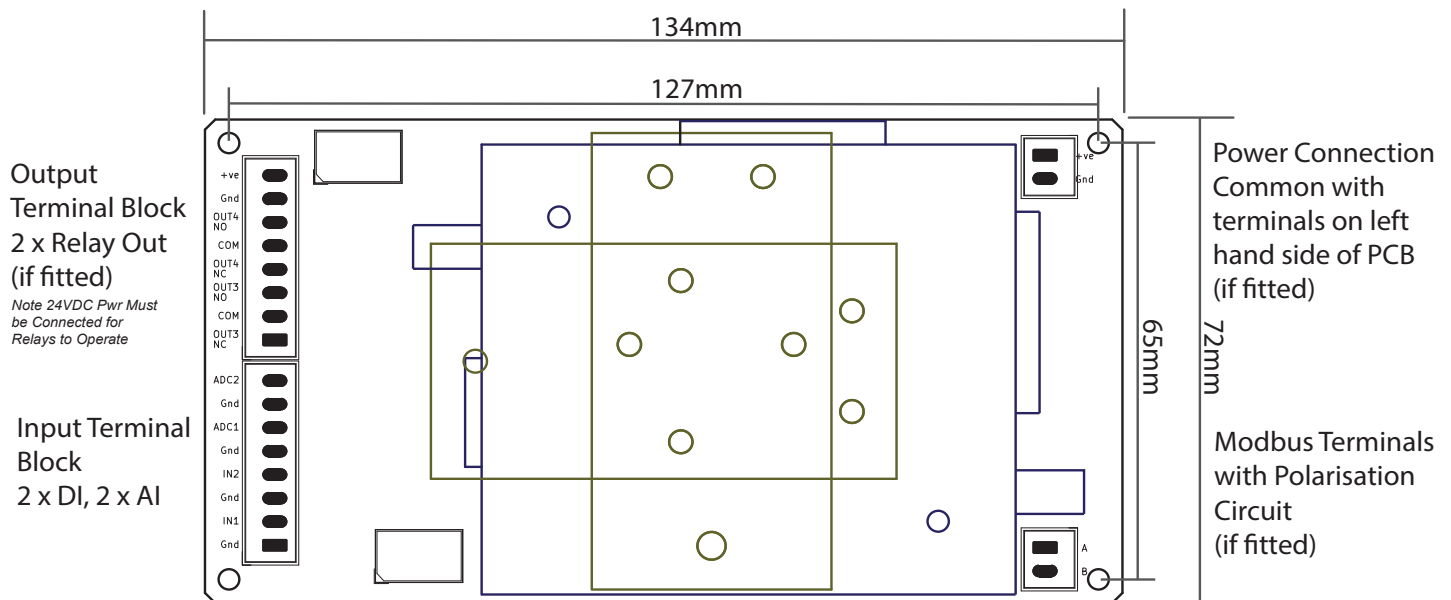

DIN Clip (optional)

MTH000000008

MTH000000009

DIN Clip Mounting Positions with Mounting Holes (dia 3.3mm) shown

(Holes sized and positioned for use with Winford DINM13-RC DIN Clip and 6mm x M4 Pozidrive countersunk screws)

Modem Mounting Position with Mounting Holes (dia 3mm) Shown
